

# Key Features

---

## **Feature 1:**

Add Links: Easily embed Adobe Photoshop links directly into Jira issues, providing swift access to relevant spreadsheets and design assets right from your project management environment.

## **Feature 2:**

Edit Links: Update or modify embedded Adobe Photoshop links effortlessly as the linked content evolves, ensuring that users always have the most current information available.

## **Feature 3:**

Remove Links: Maintain clean and organized Jira issues by removing links when they become obsolete or irrelevant to the current task.

## **Feature 4:**

View Links in Preview and Full Screen: Preview Photoshop content for a quick glance, or choose to expand links to full screen for a detailed examination without leaving the Jira interface.

## **Feature 5:**

Sort Links: Keep your Adobe Photoshop links organized by sorting them using custom criteria, such as naming conventions or date of creation/modification, allowing for easy retrieval.

## **Feature 6:**

Realign Links: Reposition Adobe Photoshop links within the Jira issue to prioritize important assets or reorganize them based on the workflow requirements.

## **Feature 7:**

View Links in List or Tile View: Toggle between a list or a visually engaging tile layout to navigate through Adobe Photoshop links according to your preference or project needs.

## **Feature 8:**

Manage Permissions: Exercise control over who can view and interact with embedded Adobe Photoshop links, ensuring that sensitive design materials are only accessed by authorized team members.

## **Feature 9:**

View Link History: Track the history of changes made to each Adobe Photoshop link, providing transparency and accountability by illuminating who updated what and when.
