

Key Features

Feature 1:

Add Links: Embed AWS Resource links directly into Jira issues for quick access to spreadsheets. This feature ensures that all relevant AWS resources are immediately accessible within the Jira platform, streamlining workflows and boosting productivity.

Feature 2:

Edit Links: Update or modify embedded AWS Resource links as the spreadsheet changes. This allows for dynamic adjustments, ensuring that the most current and accurate information is always available.

Feature 3:

Remove Links: Easily remove links when they are no longer relevant or needed. This helps maintain a clean and organized workspace within Jira.

Feature 4:

View Links in Preview and Full Screen: Preview AWS Resource content or expand it to full screen directly from within Jira, providing flexibility in how resources are accessed and allowing for a clear view of detailed information.

Feature 5:

Sort Links: Organize AWS Resource links by custom criteria, name, or date to quickly find and access specific resources, enhancing productivity and ensuring efficient use of time.

Feature 6:

Realign Links: Adjust the positioning of AWS Resource links within the Jira issue for optimal layout and presentation, ensuring resources are displayed in the most user-friendly manner.

Feature 7:

View Links in List or Tile View: Toggle between list or tile layout for viewing links, allowing users to choose their preferred method of display based on individual needs and preferences.

Feature 8:

Manage Permissions: Control who can view and interact with AWS Resource links embedded in Jira. This feature enhances security and ensures that only authorized personnel have access to specific resources.

Feature 9:

View Link History: Access the history of changes made to each AWS Resource link, facilitating tracking and auditing of developments and modifications.
