

Add/Edit/Remove a Canva Link

- [Add a Canva Link](#)
- [Edit a Canva Link](#)
- [Remove a Canva Link](#)

Add a Canva Link

Click the **"Add"** button (See image below). A form will appear inline, allowing you to enter:

- **Canva Design Embedded URL** - The link to your Canva design.
- **Title** - A meaningful name for the design. (optional)

NOTE: It is important to get the link in the right link. You will need a Canva smart embedded link. To do this, navigate to your Canva design, then go to Share > More > Embed > Smart embed link. Click on "Copy".

Once the details are entered, click **Add**.

The screenshot displays a Jira issue configuration page. At the top, there are tabs for 'DEV-25' and 'DEV-41'. Below the tabs, a message states 'Configuration is unique for each board/project'. A toolbar includes 'Attach', 'Add a child issue', 'Link issue', and 'Canva Integration'. The 'Description' field is empty, and the 'Story point estimate' is set to 0.25. The 'Canva Integration' section is expanded, showing 'Canva Integration by Appvibe' and a 'Canva Links' section. The 'Canva Links' section contains a text input field with the URL 'https://www.canva.com/design/DACnhpNZtug/YpCDZpvMOBomWNZjzAJZGQ/view' and a text input field with 'Configuration Drawing'. A green 'Add' button is visible next to the second input field. Below the configuration section is a comment area with a text input field and several reaction buttons: 'Looks good!', 'Need help?', 'This is blocked...', 'Can you clarify...?', and 'Th >'. A 'Pro tip' message at the bottom suggests pressing 'M' to comment. On the right side, a details sidebar is open, showing fields for 'Assignee' (Unassigned), 'Labels' (None), 'Parent' (DEV-25 Configuration for Test ...), 'Team' (None), 'Development', and 'Reporter' (Admin). The sidebar also shows 'Automation' and 'Rule executions' sections, along with creation and update timestamps.

Edit a Canva Link

Each saved link can be **Edited**:

- **Edit**: Opens the inline form for modifications.
