Introduction

Welcome to ChatPM

ChatPM is a powerful AI-driven assistant designed to enhance your productivity while working on Jira projects. With ChatPM, you can:

- Ask questions and receive detailed explanations on technical concepts, workflows, and project management methodologies.
- Get assistance with problem-solving, brainstorming, and planning related to your Jira tasks.
- Benefit from persistent chat memory, allowing you to reference previous conversations within the same session.

ChatPM serves as a versatile helper AI to support your efforts and provide valuable insights.

Key Features

- **AI Expertise**: Tap into advanced AI for guidance, advice, and best practices related to software development, Agile methodologies, and more.
- **Convenient Access**: Seamlessly integrate ChatPM into your Jira workflow without disrupting your existing processes.

ChatPM empowers your team with instant AI support, making your Jira projects more efficient and informed.
