

# Azure DevOps Integration for monday.com

The purpose of this Azure DevOps integration is to connect Azure DevOps repositories to your [monday.com](https://monday.com) account. After installing the app, you will be able to see your repositories listed in your monday.com board view. You will also be able to search, filter, create repos, branches, or delete them.

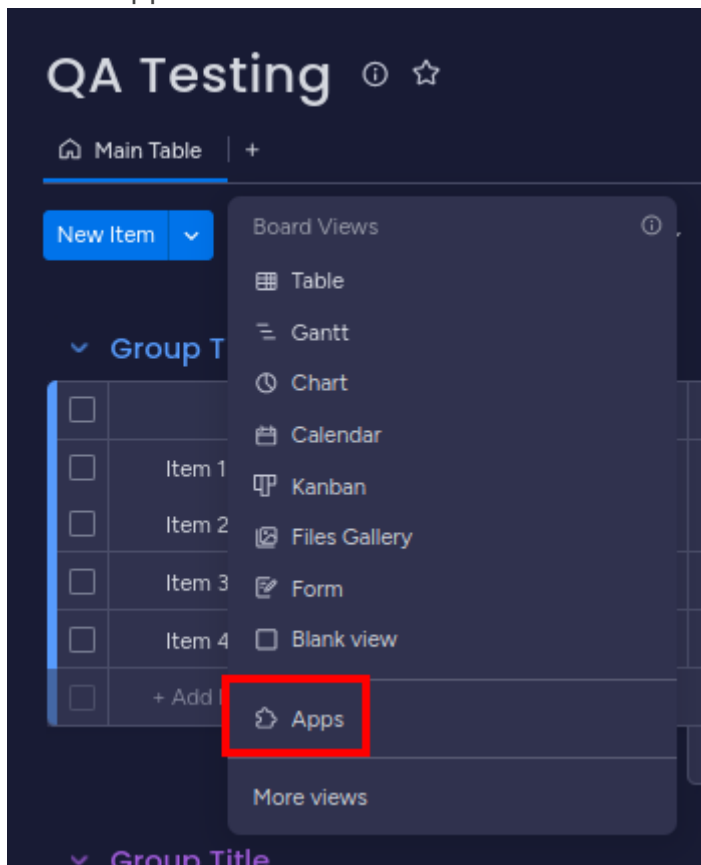

## Getting Started

After installing the app, you can add it to a monday board by following these steps:

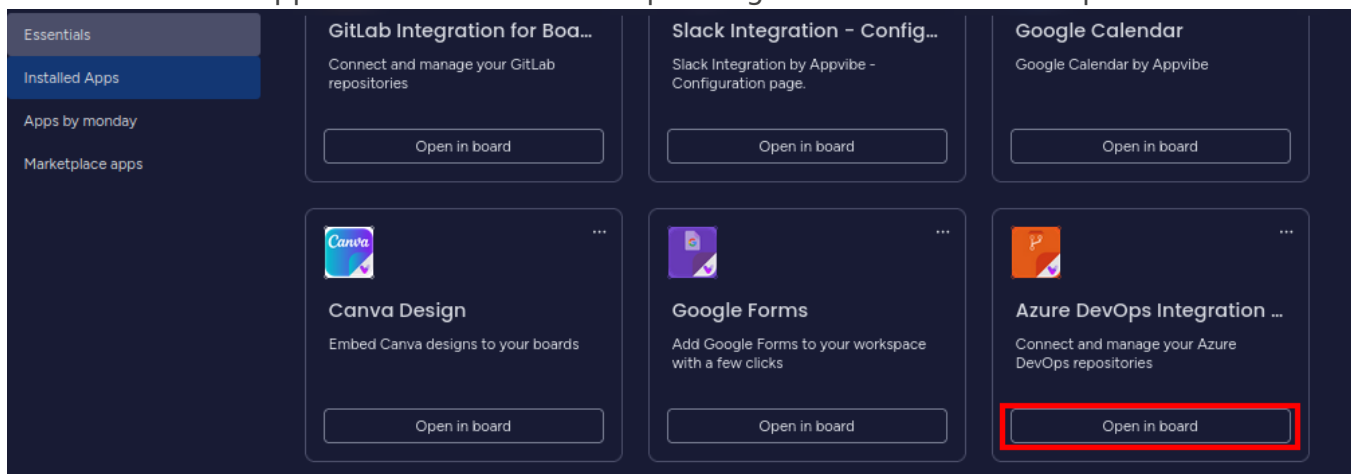

1. Click on the + icon for your monday board

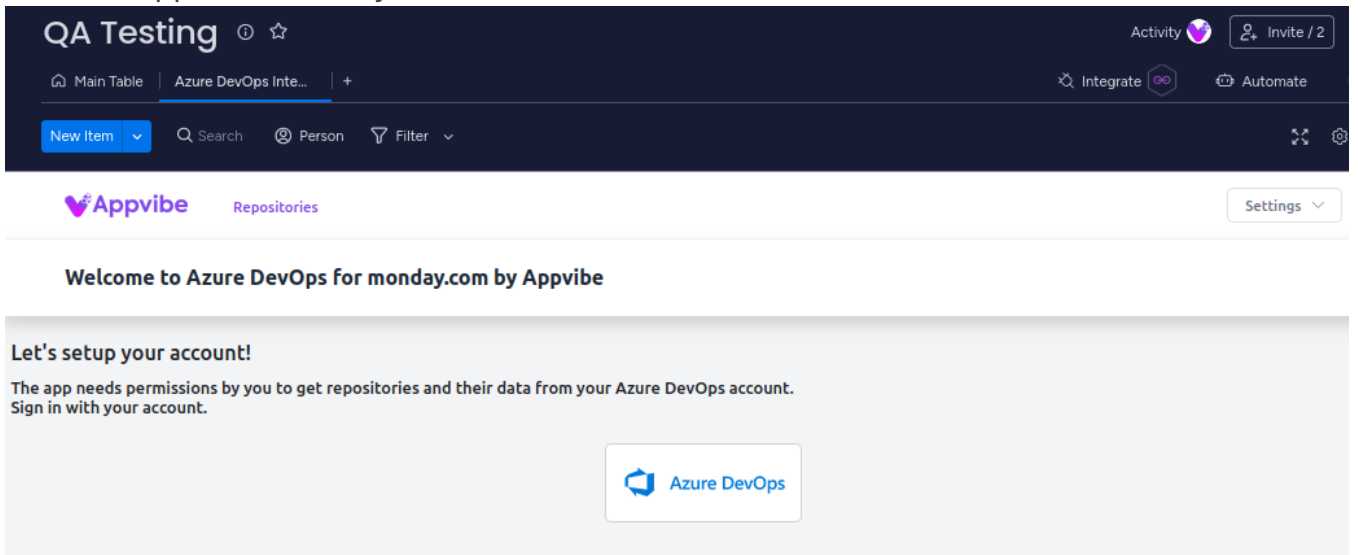

2. Go to "Apps"

3. Under "Installed Apps" find the Azure DevOps integration and click on "Open in board"

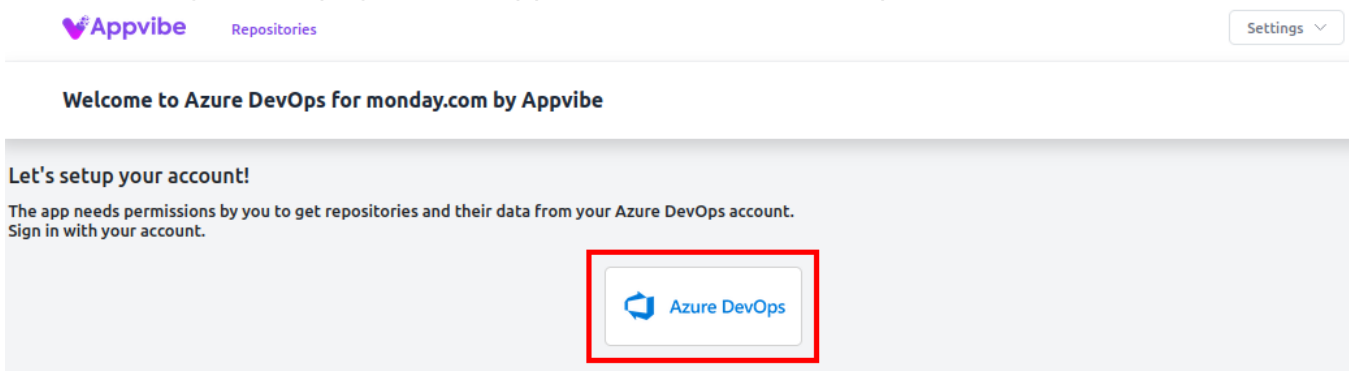

4. Now the app is added to your board:

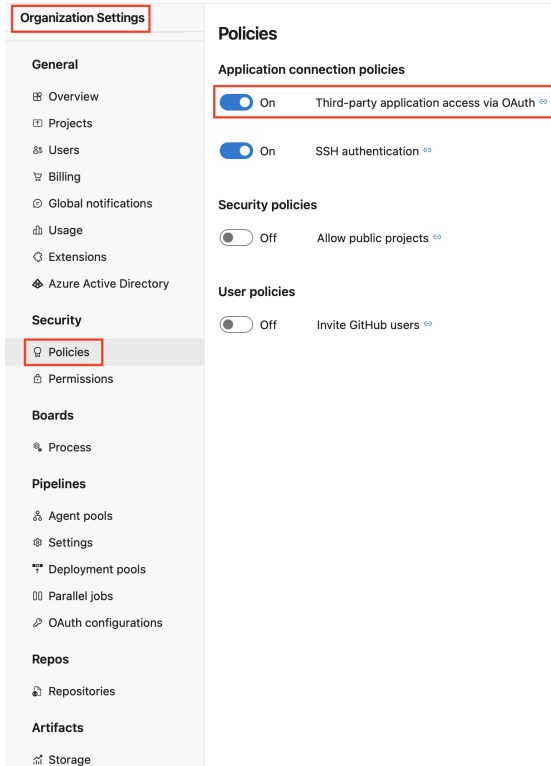

## Connecting an Azure DevOps account

To connect an Azure DevOps account, please follow the steps below:

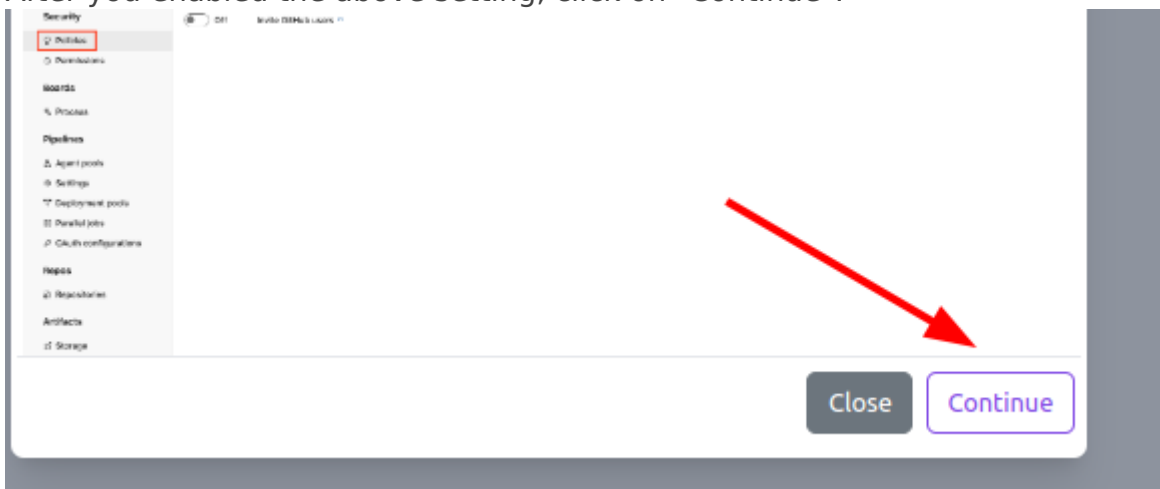

1. On the configuration page of the app, click on "Azure DevOps"

- Please follow the instructions and make sure to enable `Third-party application access` via OAuth` in `Organization Settings` -> `Policies` for your Azure DevOps organization:

- After you enabled the above setting, click on "Continue".

- A new tab will open, and you can log in to your Azure DevOps account. If you see the successful authorization message, you can close the new tab

**Authentication is successful!**  
You can close this window now.

## Creating a repository

To create a new repository with the app, click on the "Create a repository" button:

## Repositories

Create a repository

ID	Name	Location	Description	Visibility	Archived	Open Issues	Full Name	Url

Row count: 10 Go to page: 1

Use the buttons to update, switch between public and private, archive or delete a repository.

In the case of archiving or deleting the repository, you will be asked to type the full name of the repository to confirm the action.

## Sorting and Filtering

You can easily sort and filter your repositories by using the header.

ID	Name	Location	Description	Visibility	Archived	Open Issues	Full Name	Url
----	------	----------	-------------	------------	----------	-------------	-----------	-----

Click on the column names to sort the columns in an ascending or descending order.

You can use the filter icons to search and filter for IDs, names, locations, etc.

### Filter by Name

## Creating branches

To create a new branch for a repo from the app, please follow these steps:

1. Click on the Repository name

ID	Name	Location
676460224	Test4	GitHub - testuser23468
676459142	Test3	GitHub - testuser23468
676458974	Test2	GitHub - testuser23468
676458823	Test1	GitHub - testuser23468

2. Select "Branches" from the top

3. Then, click on "Create a branch"

4. Fill in the details and click on "Create"

### Create a branch

Title

Source Branch

## Creating pull requests

To create a new pull request for a repo from the app, please follow these steps:

1. Click on the Repository name

ID	Name	Location
676460224	Test4	GitHub - testuser23468
676459142	Test3	GitHub - testuser23468
676458974	Test2	GitHub - testuser23468
676458823	Test1	GitHub - testuser23468

2. Select "Pull Requests" from the top

3. Then, click on "Create a pull request"

4. Fill in the details and click on "Create"

A screenshot of the 'Create a pull request' form. The form has a title 'Create a pull request' and several input fields: 'Contribute from' (a dropdown menu), 'Contribute to' (a dropdown menu), 'Title' (a text input field), and 'Comment' (a text area). At the bottom right of the form, there are two buttons: 'Close' and 'Create'.
