

Canva Integration for Jira

User Documentation: Canva Integration for Jira App

This guide explains how to use the **Canva Integration for Jira** app. It helps you manage **Canva design links** directly within Jira issues. With this app, you can **add, edit, delete, and embed Canva designs** effortlessly, providing easy access to relevant designs without leaving Jira.

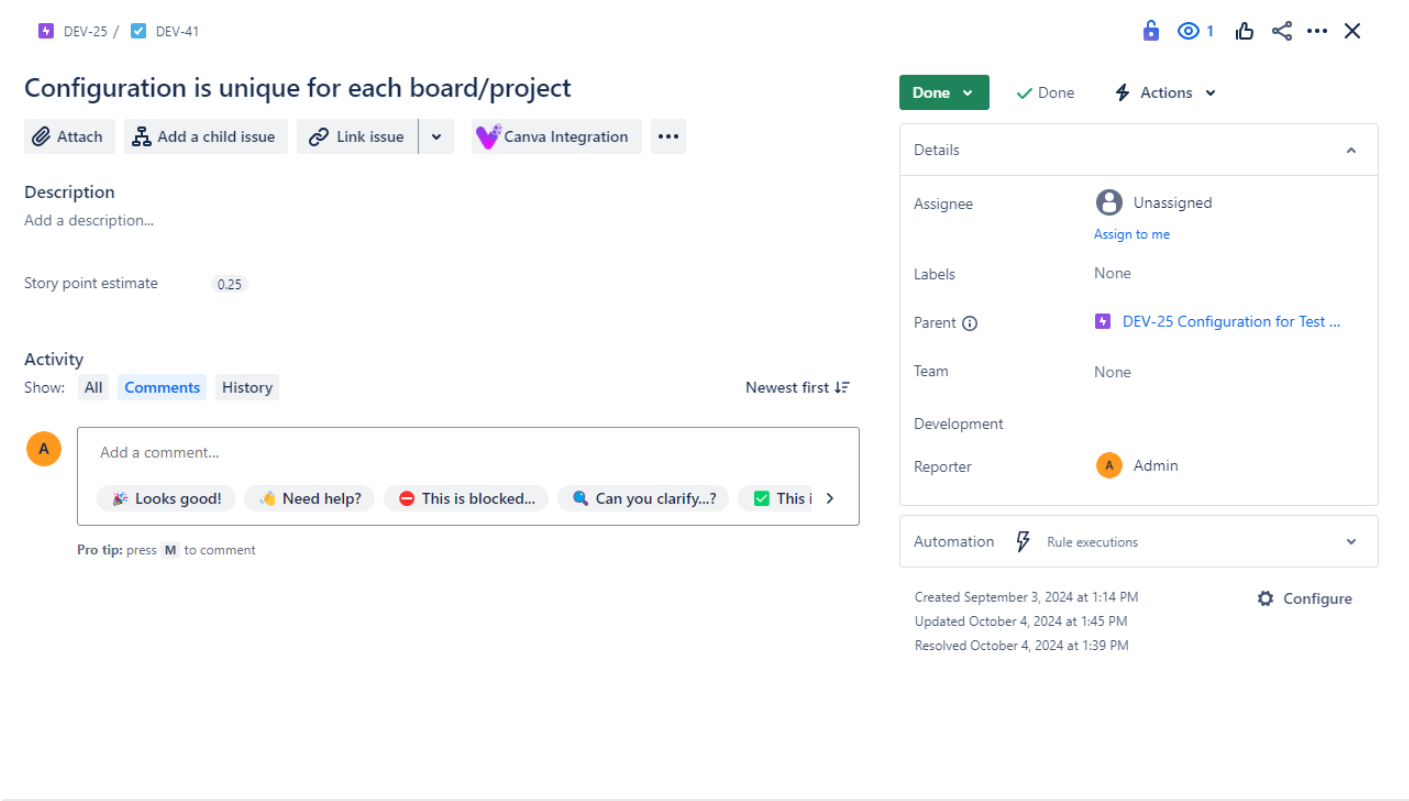

Overview of Features

- **List saved Canva links** within Jira issues.
 - **Add or edit links** with an inline form.
 - **Delete links** with a confirmation popup.
 - **View Canva designs** embedded directly in Jira using an iframe.
 - **Store links per issue** with the **Custom Entity Store** for persistent data.
-

How to Use the Canva Integration App

1. Open the Canva Integration Panel

Click the **"Canva Integration"** button in the toolbar of a Jira issue (see image below). This opens the Canva section where you can manage your links.

2. View Saved Canva Links

In the **Canva Links section** (See image below), you'll see all saved links related to the current issue and be able to add a Canva embeded image.

The screenshot displays a Jira issue page. At the top, there are tabs for 'DEV-25 / DEV-41'. Below this, a header states 'Configuration is unique for each board/project'. A toolbar includes buttons for 'Attach', 'Add a child issue', 'Link issue', and 'Canva Integration'. The 'Canva Integration' section shows 'Canva Integration by Appvibe' and a 'Canva Links' section with an 'Add' button. The main content area has a 'Description' field and a 'Story point estimate' of 0.25. A comment box at the bottom allows adding a comment with a 'Pro tip: press M to comment'. The right sidebar contains a 'Details' section with fields for Assignee (Unassigned), Labels (None), Parent (DEV-25 Configuration for Test ...), Team (None), Development, and Reporter (Admin). Below this is an 'Automation' section with 'Rule executions' and a 'Configure' button. The bottom of the sidebar shows the issue's creation and update history.

3. Add a New Canva Link

Click the **"Add"** button (See image below). A form will appear inline, allowing you to enter:

- **Canva Design Embedded URL** – The link to your Canva design.
- **Titel** – A meaningful name for the design. (optional)

NOTE: It is important to get the link in the right link. You will need a Canva smart embeded link. To do this, navigate to your Canva desgin, then go to Share > More > Embed > Smart embed link. Click on "Copy".

Once the details are entered, click **Add**.

The screenshot displays a Jira issue configuration page. At the top, there are tabs for 'DEV-25' and 'DEV-41'. Below this, a header states 'Configuration is unique for each board/project'. A toolbar includes buttons for 'Attach', 'Add a child issue', 'Link issue', and 'Canva Integration'. The 'Description' field is empty, and the 'Story point estimate' is set to '0.25'. The 'Canva Integration' section shows 'Canva Integration by Appvibe' and a 'Canva Links' field containing a URL. A green 'Add' button is at the bottom right of this section. Below the links field is a comment box with a 'Pro tip: press M to comment' message. On the right, a sidebar shows issue details: 'Assignee' is 'Unassigned', 'Labels' are 'None', 'Parent' is 'DEV-25 Configuration for Test ...', 'Team' is 'None', 'Development' is 'None', and 'Reporter' is 'Admin'. The sidebar also shows 'Automation' and 'Rule executions' sections.

4. Edit or Remove a Canva Link

Each saved link (Image 4) has options to **Edit** or **Remove**:

- **Show**: Opens an inline form showing the Canva image.
- **Edit**: Opens the inline form for modifications.
- **Delete**: Triggers a **confirmation popup** for deletion.

FAQ

1. What if the Canva link doesn't load?

Ensure the link is public and accessible. If Canva blocks embedding, try opening it in a new tab.

2. Can I add multiple links to one issue?

Yes, you can add multiple Canva links to each Jira issue.

3. How secure are my Canva links?

All links are stored within Jira's **Custom Entity Store** and are scoped to each issue, ensuring privacy and security.

Conclusion

The **Canva Integration for Jira** app makes it easy to manage and access Canva designs within Jira. With seamless embedding, your team stays focused on tasks without switching between tools.
