

Canva Integration for Jira

User Documentation: Canva Integration for Jira App

This guide explains how to use the **Canva Integration for Jira** app. It helps you manage **Canva design links** directly within Jira issues. With this app, you can **add, edit, delete, and embed Canva designs** effortlessly, providing easy access to relevant designs without leaving Jira.

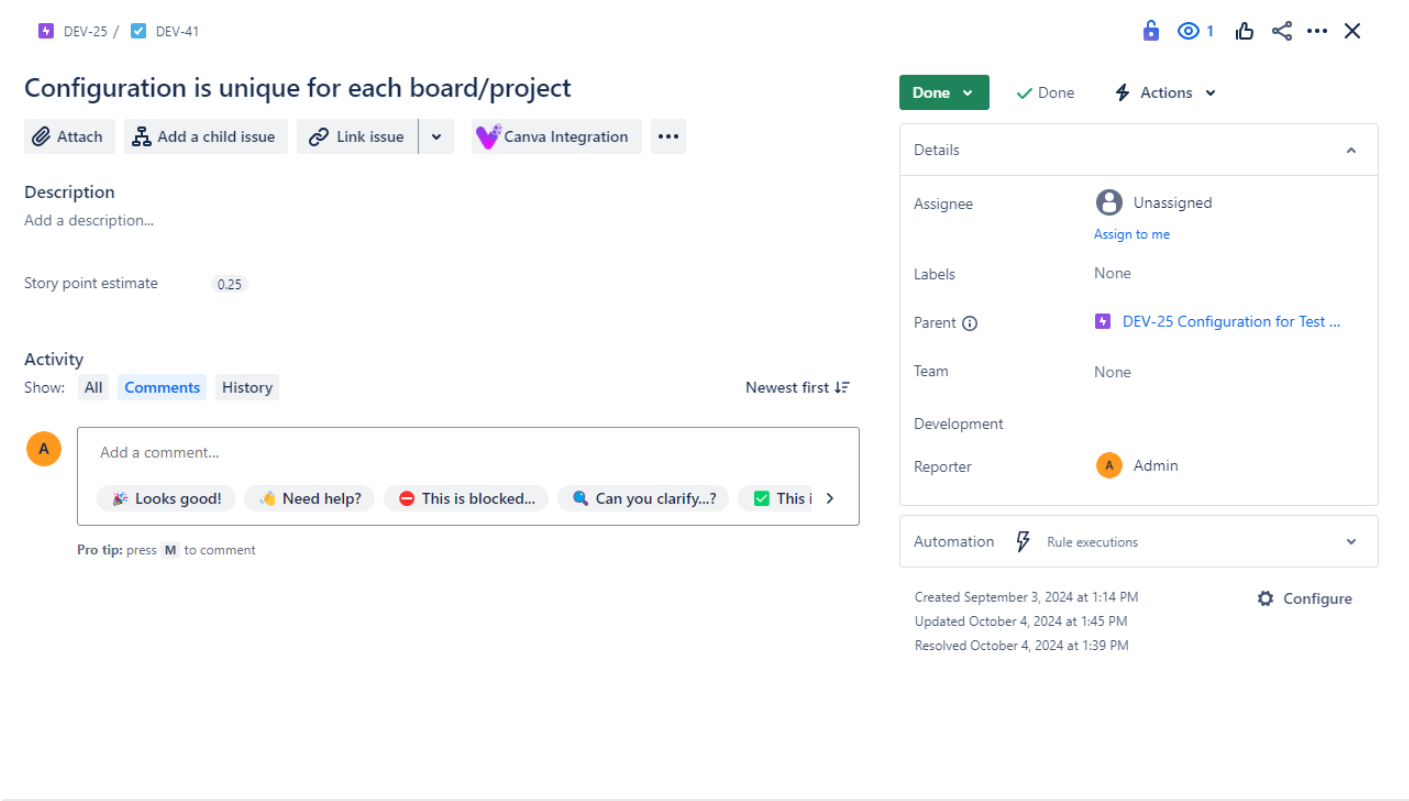

Overview of Features

- **List saved Canva links** within Jira issues.
 - **Add or edit links** with an inline form.
 - **Delete links** with a confirmation popup.
 - **View Canva designs** embedded directly in Jira using an iframe.
 - **Store links per issue** with the **Custom Entity Store** for persistent data.
-

How to Use the Canva Integration App

1. Open the Canva Integration Panel

Click the **"Canva Integration"** button in the toolbar of a Jira issue (see image below). This opens the Canva section where you can manage your links.

2. View Saved Canva Links

In the **Canva Links section** (See image below), you'll see all saved links related to the current issue and be able to add a Canva embeded image.

The screenshot shows a Jira issue page for 'DEV-25 / DEV-41'. The main content area has a title 'Configuration is unique for each board/project' and a description 'Add a description...'. Below the description is a 'Story point estimate' of 0.25. The 'Canva Integration' section is visible, showing 'Canva Integration by Appvibe' and 'Canva Links'. A blue 'Add' button is located next to the 'Canva Links' section. The sidebar on the right contains a 'Details' section with fields for Assignee (Unassigned), Labels (None), Parent (DEV-25 Configuration for Test ...), Team (None), Development, and Reporter (Admin). Below the details is an 'Automation' section with 'Rule executions'. At the bottom of the sidebar, there is a 'Configure' button and a timestamp: 'Created September 3, 2024 at 1:14 PM', 'Updated October 4, 2024 at 1:45 PM', and 'Resolved October 4, 2024 at 1:39 PM'.

3. Add a New Canva Link

Click the **"Add"** button (See image below). A form will appear inline, allowing you to enter:

- **Canva Design Embedded URL** – The link to your Canva design.
- **Titel** – A meaningful name for the design. (optional)

NOTE: It is important to get the link in the right link. You will need a Canva smart embeded link. To do this, navigate to your Canva desgin, then go to Share > More > Embed > Smart embed link. Click on "Copy".

Once the details are entered, click **Add**.

The screenshot displays a Jira issue configuration page for a project with IDs DEV-25 and DEV-41. The main configuration area includes a title 'Configuration is unique for each board/project', a description field, a story point estimate of 0.25, and a 'Canva Integration' section. Under 'Canva Integration', there is a 'Canva Links' section with a text input field containing a Canva design URL and a label 'Configuration Drawing'. An 'Add' button is visible next to the input field. Below the configuration area is a comment section with a text input and several reaction buttons: 'Looks good!', 'Need help?', 'This is blocked...', 'Can you clarify...?', and 'Th'. A 'Pro tip' message at the bottom suggests pressing 'M' to comment.

The sidebar on the right shows the issue details for 'DEV-25 Configuration for Test ...'. It includes fields for Assignee (Unassigned), Labels (None), Parent (DEV-25 Configuration for Test ...), Team (None), Development, and Reporter (Admin). Below the details, there is an 'Automation' section with a 'Rule executions' dropdown and a 'Configure' button. The sidebar also shows the issue's creation and update history.

4. Edit or Remove a Canva Link

Each saved link (Image 4) has options to **Edit** or **Remove**:

- **Show**: Opens an inline form showing the Canva image.
- **Edit**: Opens the inline form for modifications.
- **Delete**: Triggers a **confirmation popup** for deletion.

FAQ

1. What if the Canva link doesn't load?

Ensure the link is public and accessible. If Canva blocks embedding, try opening it in a new tab.

2. Can I add multiple links to one issue?

Yes, you can add multiple Canva links to each Jira issue.

3. How secure are my Canva links?

All links are stored within Jira's **Custom Entity Store** and are scoped to each issue, ensuring privacy and security.

Conclusion

The **Canva Integration for Jira** app makes it easy to manage and access Canva designs within Jira. With seamless embedding, your team stays focused on tasks without switching between tools.
