

Canva Integration for Jira

User Documentation: Canva Integration for Jira App

This guide explains how to use the **Canva Integration for Jira** app. It helps you manage **Canva design links** directly within Jira issues. With this app, you can **add, edit, delete, and embed Canva designs** effortlessly, providing easy access to relevant designs without leaving Jira.

Overview of Features

- **List saved Canva links** within Jira issues.
 - **Add or edit links** with an inline form.
 - **Delete links** with a confirmation popup.
 - **View Canva designs** embedded directly in Jira using an iframe.
 - **Store links per issue** with the **Custom Entity Store** for persistent data.
-

How to Use the Canva Integration App

1. Open the Canva Integration Panel

Click the **"Canva Integration"** button in the toolbar of a Jira issue (see image below). This opens the Canva section where you can manage your links.

The screenshot shows a Jira issue configuration page. At the top, there are two tabs: "DEV-25" (active) and "DEV-41". The main heading is "Configuration is unique for each board/project". Below this is a toolbar with buttons: "Attach", "Add a child issue", "Link issue", "Canva Integration" (highlighted with a purple icon), and a three-dot menu. The "Description" section has a placeholder "Add a description...". The "Story point estimate" is set to "0.25". The "Activity" section shows "Show: All Comments History" and "Newest first" sorting. A comment input field is visible with a "Pro tip: press M to comment" note. The right sidebar contains a "Details" section with fields: "Assignee" (Unassigned), "Labels" (None), "Parent" (DEV-25 Configuration for Test ...), "Team" (None), "Development" (None), and "Reporter" (Admin). Below the details is an "Automation" section with "Rule executions" and a "Configure" button. At the bottom, the issue's creation and update history is shown: "Created September 3, 2024 at 1:14 PM", "Updated October 4, 2024 at 1:45 PM", and "Resolved October 4, 2024 at 1:39 PM".

2. View Saved Canva Links

In the **Canva Links section** (See image below), you'll see all saved links related to the current issue and be able to add a Canva embedded image.

The screenshot shows a Jira issue configuration page. At the top, there are tabs for 'DEV-25' and 'DEV-41'. Below the tabs, a message states 'Configuration is unique for each board/project'. The main configuration area includes buttons for 'Attach', 'Add a child issue', 'Link issue', and 'Canva Integration'. The 'Canva Integration' section is expanded, showing 'Canva Integration by Appvibe' and a 'Canva Links' section with an 'Add' button. A description field and a story point estimate of 0.25 are also visible. On the right, a details sidebar shows the issue is 'Unassigned', has no labels, and is a child of 'DEV-25 Configuration for Test ...'. The reporter is 'Admin'. At the bottom, there is a comment input field with a 'Pro tip: press M to comment' and a row of quick actions: 'Looks good!', 'Need help?', 'This is blocked...', 'Can you clarify...?', and 'Th >'. The sidebar also shows automation rules and creation/update/resolution timestamps.

3. Add a New Canva Link

Click the **"Add"** button (See image below). A form will appear inline, allowing you to enter:

- **Canva Design Embedded URL** – The link to your Canva design.
- **Titel** – A meaningful name for the design. (optional)

NOTE: It is important to get the link in the right link. You will need a Canva smart embedded link. To do this, navigate to your Canva desgin, then go to Share > More > Embed > Smart embed link. Click on "Copy".

Once the details are entered, click **Add**.

The screenshot displays a Jira issue configuration page. At the top, there are project identifiers 'DEV-25' and 'DEV-41'. The main heading is 'Configuration is unique for each board/project'. Below this, there are several buttons: 'Attach', 'Add a child issue', 'Link issue', and 'Canva Integration'. The 'Description' field is empty with the placeholder 'Add a description...'. The 'Story point estimate' is set to '0.25'. Under the 'Canva Integration' section, there is a sub-section 'Canva Integration by Appvibe' and a 'Canva Links' section. The 'Canva Links' section contains a text input field with the URL 'https://www.canva.com/design/DACnhpNZtug/YpCDZpvMObomWNZjzAJZGQ/view' and a label 'Configuration Drawing'. There are 'Cancel' and 'Add' buttons. Below the 'Canva Links' section is a comment box with the placeholder 'Add a comment...' and several reaction buttons: 'Looks good!', 'Need help?', 'This is blocked...', 'Can you clarify...?', and 'Th'. A 'Pro tip: press M to comment' is shown at the bottom. On the right side, there is a sidebar with a 'Details' section containing fields for 'Assignee' (Unassigned), 'Labels' (None), 'Parent' (DEV-25 Configuration for Test ...), 'Team' (None), 'Development', and 'Reporter' (Admin). Below the 'Details' section is an 'Automation' section with 'Rule executions' and a 'Configure' button. At the bottom of the sidebar, there are timestamps: 'Created September 3, 2024 at 1:14 PM', 'Updated October 4, 2024 at 1:45 PM', and 'Resolved October 4, 2024 at 1:39 PM'.

4. Edit or Remove a Canva Link

Each saved link (Image 4) has options to **Edit** or **Remove**:

- **Show**: Opens an inline form showing the Canva image.
- **Edit**: Opens the inline form for modifications.
- **Delete**: Triggers a **confirmation popup** for deletion.

FAQ

1. What if the Canva link doesn't load?

Ensure the link is public and accessible. If Canva blocks embedding, try opening it in a new tab.

2. Can I add multiple links to one issue?

Yes, you can add multiple Canva links to each Jira issue.

3. How secure are my Canva links?

All links are stored within Jira's **Custom Entity Store** and are scoped to each issue, ensuring privacy and security.

Conclusion

The **Canva Integration for Jira** app makes it easy to manage and access Canva designs within Jira. With seamless embedding, your team stays focused on tasks without switching between tools.
