

# Slack Integration for monday.com

## Slack Integration for monday.com

The Slack integration for [monday.com](https://monday.com) provides communication between your [monday.com](https://monday.com) workspace and Slack. Any change or update within monday can be configured to notify one or multiple Slack channels. The Slack Jira Integration app allows you to connect these two services and make your distributed work environment more productive, effective, and rewarding.

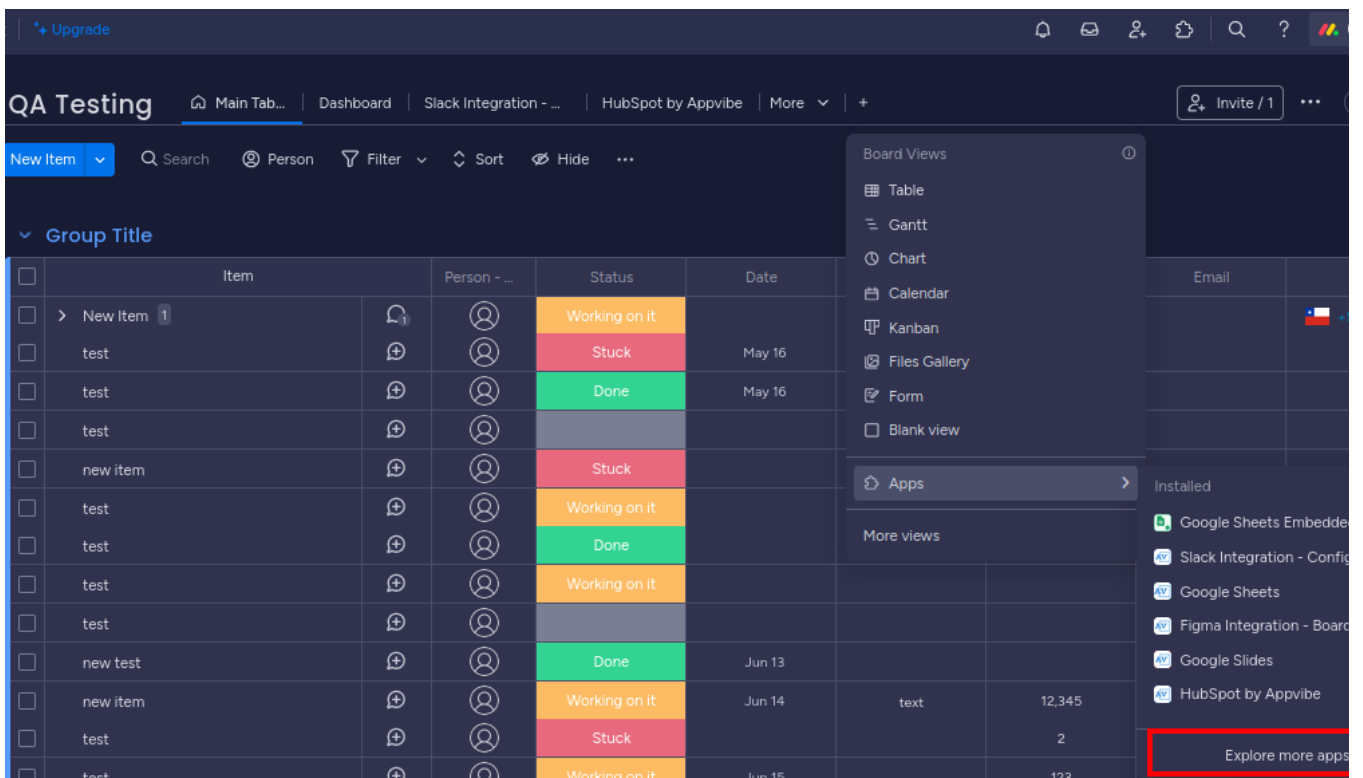

## Easy and Quick App Setup

These straightforward actions will deliver the add-on to your monday.com instance just in a few clicks.

## Setting up the Slack integration

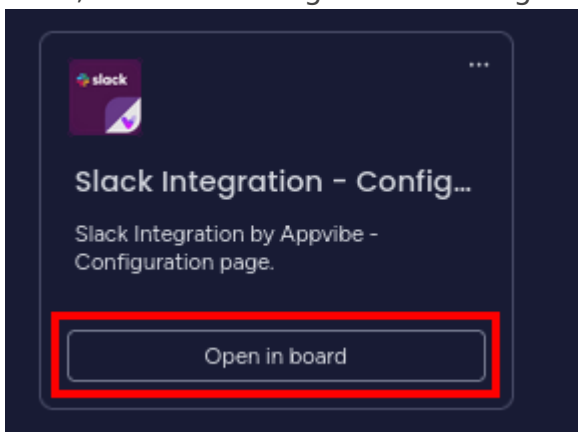

- 1.

After installing the app, add it to your board by clicking the plus icon, then selecting “Apps” > “Explore more apps”

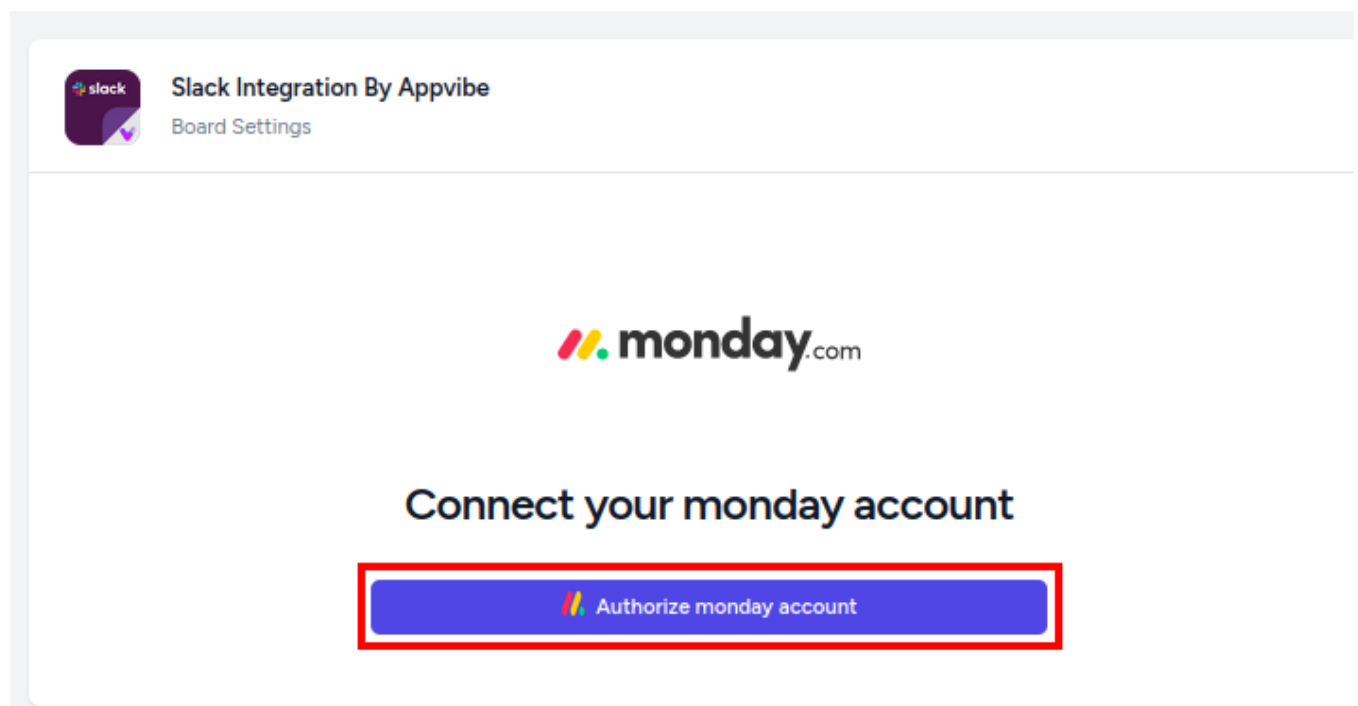

2.

Here, find Slack Integration - Configuration and click “Open in board”.

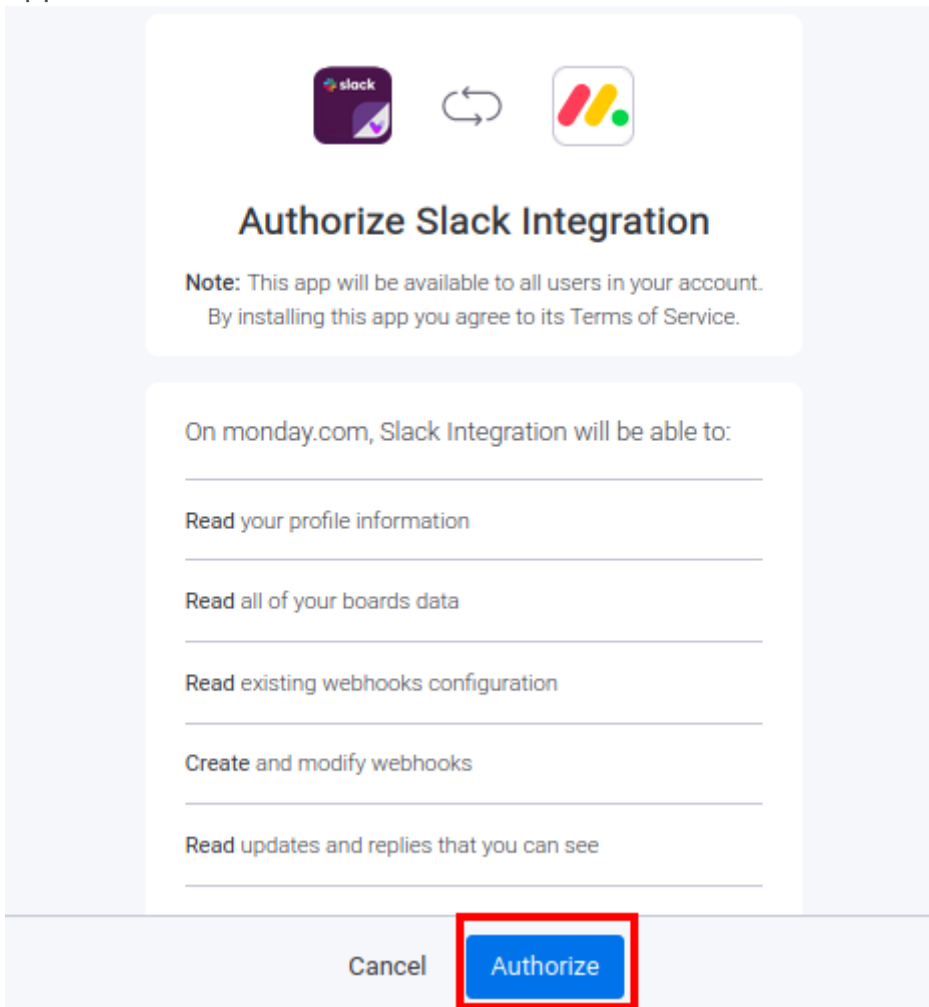

3.

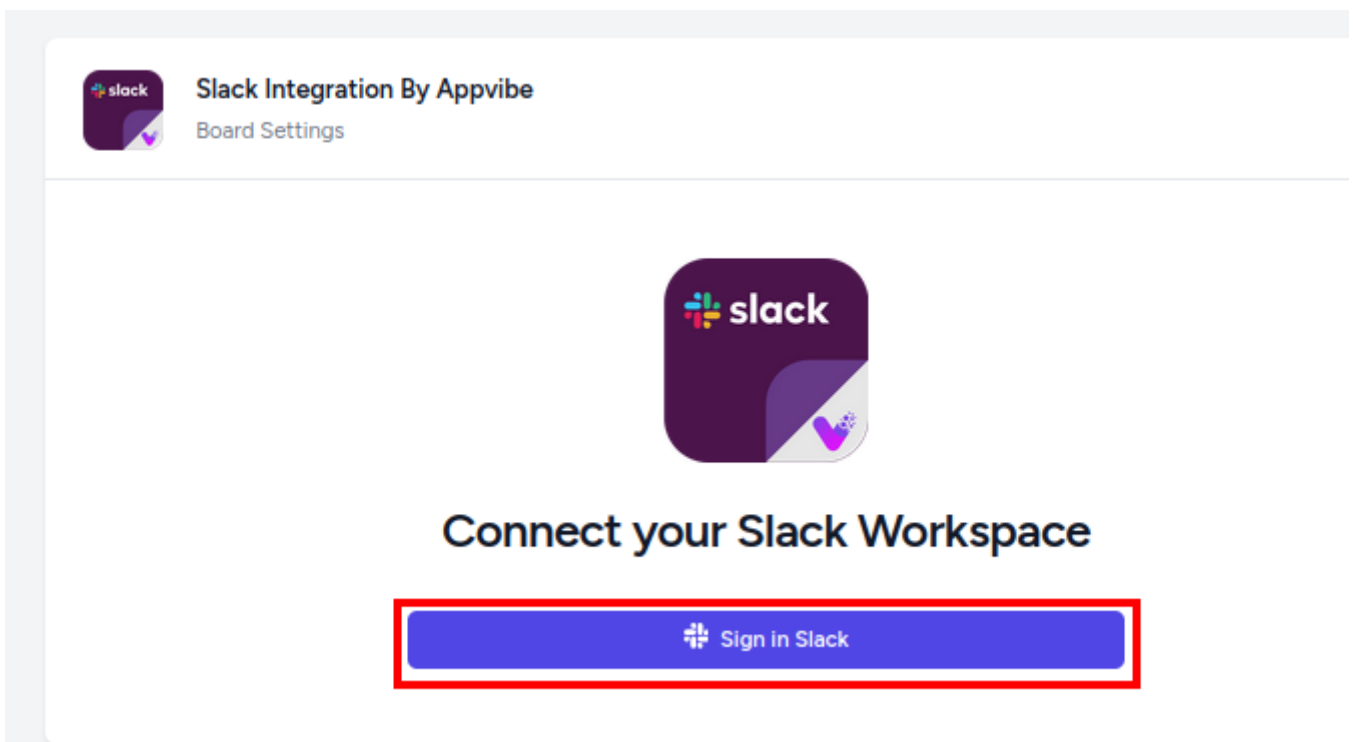

On the configuration page first, you need to click on the button to authenticate your monday account.

4. Follow the instructions on screen to log into your monday account and authorize the app.

5. Next, you need to log into your Slack account and authorize access to your workspace. After clicking "Sign in Slack", follow the instructions on the pop-up window.

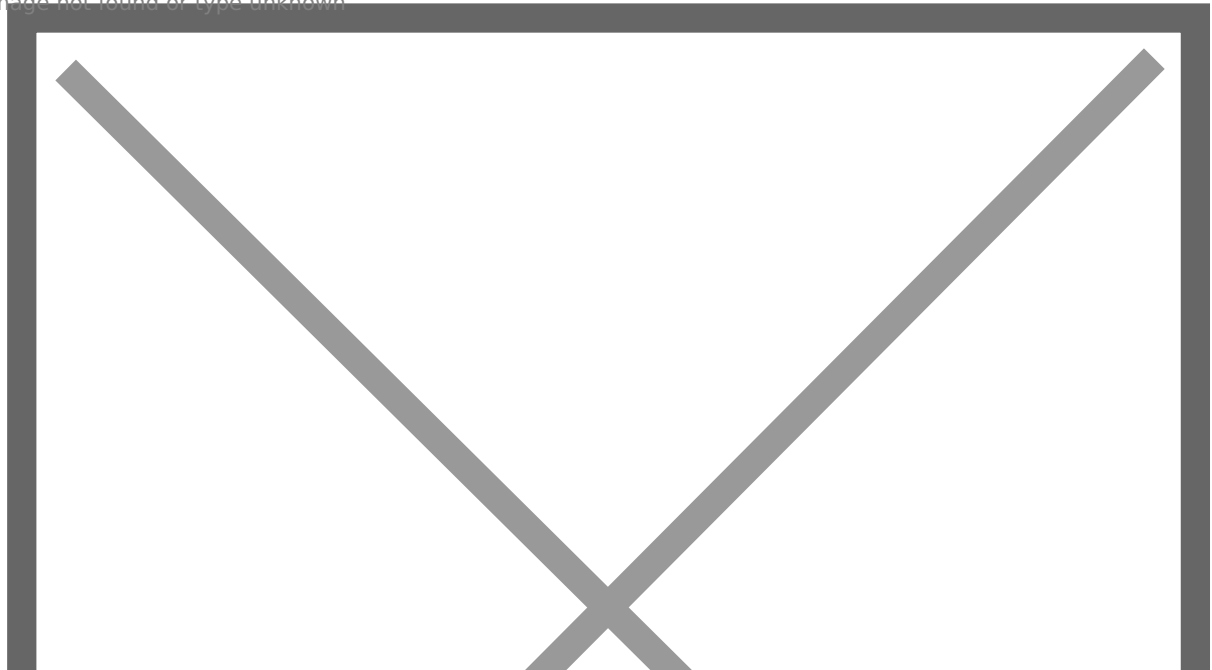

Your account is now connected

## Setting up notifications

1.

To set up notifications, select the events you want to be notified of.

Image not found or type unknown

2.

Next, select the Slack channel from the dropdown where you want to get the notifications.
