

# Test Management for monday.com

The purpose of this Test Management application is to create and execute tests in your [monday.com](#) account. The app has two main views: the board view and the item view. The purpose of the board view is to create, edit, and organize your tests, as well as to add steps that can be executed. The purpose of the item view is to execute these tests and record the results.

## Getting Started

After installing the app, first, add it to your board view, by following these steps:

1. Click on the + icon for your monday board

**Test Management** ⓘ ☆

## 2. Click on "View" in the menu

The screenshot shows the Appvibe Test Management interface. At the top, there's a header with the Appvibe logo, 'Test Management' title, and user options like 'Activity', 'Invite / 1', 'Integrate', and 'Automate'. Below the header, there's a navigation bar with 'Main Table', 'Test Management', and a '+' icon. A 'New Item' button is on the left, followed by search and filter options. The main content area is titled 'Test Cases' and includes a sidebar with 'Add Group', 'All Test Cases', and 'Test Group #1'. The main table lists test cases with columns for Name, Description, Coverage, Status, and Updated At. A 'View' button is highlighted in a red box in the top right of the table. Below the table, there's an 'Archived' button.

	Name	Description	Coverage	Status	Updated At
<input checked="" type="checkbox"/>	Testing for ite...	This is a test	None	Draft	2023-11-07

## 3. Here, you can edit the basic details of the test. You can also edit the status of the test Draft/Approved/Declined. This can be used to signal to the team which tests should be used.

The screenshot shows the Appvibe Test Management interface with the 'Details' tab selected for a specific test case. The header is the same as the previous screenshot. The main content area is titled 'Testing for item 1' and includes a sidebar with 'Details' and 'Script' tabs. The main form has fields for 'Name' (Testing for item 1), 'Description' (This is a test), 'Coverage' (None), and 'Status' (Draft). There's a '+ Add' button next to the Coverage field.

Name:  
Testing for item 1

Description:  
This is a test

Coverage:  
None

Status:  
Draft

4. Use the "Coverage" field to add tests to your monday board "Main Table". This will allow you and your team to execute the steps you add to the test. You can add multiple items to one test case.

5. To add testing steps, switch to the "Script" tab and click on "Create Step".

The screenshot shows the Appvibe Test Management interface. At the top, there's a header with 'Test Management' and a star icon. Below it, a navigation bar includes 'Main Table', 'Test Management', and a plus icon. On the right, there are links for 'Activity', 'Integrate', and 'Automate'. A search bar and filters for 'Person' and 'Filter' are also present. The main content area shows 'Appvibe' logo and 'Test Cases > Testing for item 1'. Two tabs, 'Details' and 'Script', are visible, with 'Script' highlighted by a red box. A red arrow points from this box to a blue '+ Create S' button on the right. Below the tabs, there's a 'Steps' dropdown menu and the text 'No script created yet'.

6. Fill out the details of the testing step. Repeat it for as many testing steps you need.

This screenshot shows the 'Script' tab in the Appvibe Test Management interface. The 'Details' and 'Script' tabs are at the top, with 'Script' selected. Below them is a 'Steps' dropdown menu and a blue '+ Create S' button. The main form area is titled 'Step: Step 1' and contains a 'Step 1' label, an 'Instructions' field, and a 'Parameters' section. The 'Parameters' section has a table with columns 'Name' and 'Value'. A '+ Add M' button is located at the bottom right of the parameters table.

## Using the Item View

Use the item view to execute the testing steps you added according to the previous instructions.

1. Open the item you or a team mate has added from the "Coverage" field.
