- [Link Permissions](#)

# View Link History

## Step 1:

Install the Appvibe Dropbox Integration app within your Jira instance to enhance file collaboration.

## Step 2:

Once installed, every time a Dropbox link is modified within any Jira issue, the app will automatically track these changes.

## Step 3:

The modification history of each Dropbox link is stored and can be accessed at two levels - either at the specific link level or at the Jira issue level.

## Step 4:

To view the history, simply navigate to the respective Jira issue or Dropbox link, and access the stored modifications anytime you need to review changes.

# Link Permissions

## Step 1:

Navigate to the Appvibe Dropbox Integration configuration page in your Jira account or click 'Permissions' from within the link settings of a Jira issue.

## Step 2:

Assign the desired permissions to users based on their required access level:

- **Viewer:** Can see the link in the Jira issue.
- **Editer:** Can add, edit, or remove links in the Jira issue.
- **Admin:** Can manage link permissions for other users.
