

# Overview of Features

- Key Features

# Key Features

---

## **Feature 1:**

**Add Links:** Embed Figma links directly into Jira issues for quick access to spreadsheets. This enables team members to effortlessly navigate to relevant design documents and collaborate more effectively.

## **Feature 2:**

**Edit Links:** Update or modify embedded Figma links as the spreadsheet changes. Ensure your Jira issues always reflect the most current design or project status by easily editing links.

## **Feature 3:**

**Remove Links:** Remove links when they are no longer relevant. Keep your Jira issues clean and relevant by quickly removing outdated or unnecessary Figma links.

## **Feature 4:**

**View Links in Preview and Full Screen:** Preview Figma content in a small window or expand it to full screen for a detailed view. This feature allows for flexible design reviews directly within Jira.

## **Feature 5:**

**Sort Links:** Organize Figma links by custom criteria, name, or date, ensuring a streamlined workflow. Easily find the design assets you need with organized sorting.

## **Feature 6:**

**Realign Links:** Adjust the positioning of Figma links within the Jira issue to improve visibility and accessibility based on user preference.

## **Feature 7:**

**View Links in List or Tile View:** Toggle between list or tile layout for viewing links according to your preference or specific project needs.

## **Feature 8:**

**Manage Permissions:** Control who can view and interact with Figma links embedded in Jira. Set permissions to maintain project security and control access levels for different team members.

## **Feature 9:**

**View Link History:** Access the history of changes made to each Figma link. Track modifications over time to ensure accountability and understand the evolution of your project designs.
