

Overview of Features

- Key Features

Key Features

Feature 1:

Add Links: Embed Google Data Studio links directly into Jira issues for quick access to spreadsheets. This provides an easy reference for team members to the relevant data needed for project management and decision-making.

Feature 2:

Edit Links: Update or modify embedded Google Data Studio links as the spreadsheet changes. This ensures that the team always has access to the most current data and analytics.

Feature 3:

Remove Links: Remove links when they are no longer relevant. This helps to keep Jira issues clean and free of outdated or unnecessary information, ensuring efficient workflow and data management.

Feature 4:

View Links in Preview and Full Screen: Preview Google Data Studio content or expand it to full screen. This is useful for a quick look at data or more detailed analysis, providing flexibility depending on the user's needs.

Feature 5:

Sort Links: Organize Google Data Studio links by custom criteria, name, or date. This feature allows users to apply their preferred sorting method for better organization and easy access to the most relevant data.

Feature 6:

Realign Links: Adjust the positioning of Google Data Studio links within the Jira issue. Customization of the layout ensures that the most critical information is visible and prominent.

Feature 7:

View Links in List or Tile View: Toggle between list or tile layout for viewing links. This adaptability improves usability by allowing users to choose their preferred method of consuming information.

Feature 8:

Manage Permissions: Control who can view and interact with Google Data Studio links embedded in Jira. This feature enhances security and privacy by enabling administrators to define access levels and restrictions.

Feature 9:

View Link History: Access the history of changes made to each Google Data Studio link. This provides transparency and accountability, allowing teams to track updates and modifications over

time.
