Key Features

Add Links: Embed Looker links directly into Jira issues for quick access to spreadsheets, ensuring team members can easily find and utilize relevant data without leaving the Jira environment.

Edit Links: Update or modify embedded Looker links as the underlying spreadsheet changes, keeping the data accurate and up-to-date within any Jira issue.

Remove Links: Remove Looker links when they are no longer relevant to the Jira issue, maintaining a clean and organized workspace.

View Links in Preview and Full Screen: Preview Looker content within Jira for a quick glance, or expand it to full screen to see the full details, enhancing user interaction with the data.

Sort Links: Organize Looker links by custom criteria, such as name or date, which allows users to prioritize and arrange data links according to project needs.

Realign Links: Adjust the positioning of Looker links within the Jira issue to align with user preferences or project requirements, promoting better data presentation.

View Links in List or Tile View: Toggle between a list or tile layout for viewing links, providing flexibility in how embedded data is visualized and accessed.

Manage Permissions: Control which team members can view and interact with Looker links embedded in Jira, ensuring that sensitive data is only accessible by authorized users.

View Link History: Access the history of changes made to each Looker link, providing transparency and traceability of data interactions within Jira.
