View Link History

Step 1:

Install the Appvibe Mermaid Integration from the Jira marketplace to integrate Mermaid diagrams into your Jira issues seamlessly.

Step 2:

Utilize the app to create and modify Mermaid diagrams directly within your Jira issues. Every change you make to a Mermaid link is automatically tracked.

Step 3:

Access the modification history of any Mermaid link whenever needed. This history is stored at both the link level and Jira issue level, ensuring comprehensive accountability and transparency.

Step 4:

View past iterations and edits of your diagrams at any time. This feature is vital for project tracking and maintaining a clear record of diagram modifications.

Step 5:

Once you access the history, you can analyze and revert to any previous version if necessary, allowing for better version control and collaboration within your team.
