- [Link Permissions](#)

View Link History

Step 1:

Install the Appvibe Microsoft Outlook Integration app from the Atlassian Marketplace to your Jira instance. This will enable integration between Jira and Microsoft Outlook.

Step 2:

Once installed, configure the app settings to enable tracking of Microsoft Outlook links within Jira issues. This involves linking your Jira account with your Microsoft Outlook account.

Step 3:

After configuration, any modifications to a Microsoft Outlook link within a Jira issue will be automatically tracked. Ensure that the necessary permissions are granted for the app to access link data.

Step 4:

Review the history of any link modifications at any time by accessing either the link level or the Jira issue level. This history is preserved and can be viewed to monitor changes over time.

Step 5:

Benefit from improved collaboration and tracking efficiency as the integration provides a clear audit trail of all link-based modifications within your Jira issues.

Link Permissions

Step 1:

Go to the Appvibe Microsoft Outlook Integration configuration page, or click "permission" from within the link settings in a Jira issue.

Step 2:

Select the desired permissions for each user to control access to the links within the Jira issue:

- **Viewer:** Users can see the link.
- **Editer:** Users can add, edit, or remove links.
- **Admin:** Users can manage link permissions for others.
