

View Link History

Step 1:

Locate the Jira issue where the Microsoft PowerPoint link will be integrated using the Appvibe Microsoft PowerPoint Integration application.

Step 2:

Every change made to the Microsoft PowerPoint link within the Jira issue is automatically tracked and stored. This includes modifications like updates to the link or any related information.

Step 3:

The history of these modifications is maintained at either the link level or Jira issue level, providing a comprehensive log of changes.

Step 4:

Users can view this history at any time, ensuring transparency and traceability for the modifications made to the Microsoft PowerPoint link within the Jira issue.

Step 5:

The tracked history allows team members to stay updated on any alterations made, streamlining collaboration and accountability within the project management environment.
