

Overview of Features

- Key Features

Key Features

Add Links:

Embed Microsoft Teams links directly into Jira issues for quick access to spreadsheets. This feature allows users to conveniently access important data and collaborate more efficiently by linking Microsoft Teams directly to relevant Jira tasks.

Edit Links:

Update or modify embedded Microsoft Teams links as the spreadsheet changes. This ensures that the most current and accurate information is always available directly within the Jira issue, eliminating the need to navigate multiple platforms for updates.

Remove Links:

Easily remove links when they are no longer relevant to keep the Jira issue streamlined and focused. This feature helps maintain clarity and prevent any potential confusion caused by outdated links.

View Links in Preview and Full Screen:

Preview Microsoft Teams content or expand it to full screen for detailed examination. This flexibility allows users to choose how they want to interact with the linked content, either through a quick overview or an in-depth review.

Sort Links:

Organize Microsoft Teams links by custom criteria, name, or date. This enables users to quickly find the links that are most relevant to their current work, enhancing productivity and efficiency.

Realign Links:

Adjust the positioning of Microsoft Teams links within the Jira issue to maintain an organized and logical flow of information. Realigning links helps users prioritize information hierarchy within the issue.

View Links in List or Tile View:

Toggle between list or tile layout for viewing links, providing users the flexibility to choose their preferred viewing style for enhanced readability or quick scanning of available links.

Manage Permissions:

Control who can view and interact with Microsoft Teams links embedded in Jira. This feature protects sensitive information and ensures that only authorized users can access specific links, maintaining data security.

View Link History:

Access the history of changes made to each Microsoft Teams link. This audit trail is invaluable for tracking how links have evolved over time and understanding the decision-making process.

surrounding the linked content.
