

Link Permissions

Step 1:

Go to the Appvibe Microsoft Teams Integration configuration page, or click on permission from within the link settings in a Jira issue.

Step 2:

Control which users have access to the links in a given issue by assigning them one of the following permissions:

- **Viewer:** Users with view permission can see the link in the Jira issue.
- **Editor:** Users with edit permission can add, edit, or remove links in the Jira issue.
- **Admin:** Users with admin permission can manage link permissions for other users.

Assign the desired permissions for each user.

Revision #1
