# Overview of Features

# Key Features

---

## **Feature 1:**

**Add Links:** Embed Miro links directly into Jira issues for quick access to spreadsheets. This feature simplifies the workflow by allowing users to conveniently reference Miro boards from within their Jira environment, ensuring that all necessary information is at their fingertips.

## **Feature 2:**

**Edit Links:** Easily update or modify embedded Miro links as the spreadsheet changes. This ensures that the most current data is always accessible, reducing the risk of outdated information being used in project management tasks.

## **Feature 3:**

**Remove Links:** When Miro links are no longer relevant, this feature allows you to swiftly remove them, keeping your Jira issues tidy and focused on relevant content.

## **Feature 4:**

**View Links in Preview and Full Screen:** Users have the flexibility to preview Miro content or expand it to full screen, providing a customizable viewing experience tailored to their needs.

## **Feature 5:**

**Sort Links:** Organize Miro links by custom criteria, name, or date, which helps in managing and locating specific links more efficiently.

## **Feature 6:**

**Realign Links:** Adjust the positioning of Miro links within the Jira issue to ensure that the layout is optimized for clarity and ease of access.

## **Feature 7:**

**View Links in List or Tile View:** Toggle between list or tile layout for viewing links. This adaptability enhances user experience by allowing them to choose their preferred mode of visualization.

## **Feature 8:**

**Manage Permissions:** Control who can view and interact with Miro links embedded in Jira. This is crucial for maintaining data security and ensuring that only authorized team members can access sensitive information.

## **Feature 9:**

**View Link History:** Access the history of changes made to each Miro link. This feature provides transparency and allows users to track modifications, offering insights into the evolution of the linked content.

# Getting Started

# Installation

---

## Step 1:

Log in to Jira. Ensure you are logged in with Admin privileges.

## Step 2:

Open the Atlassian Marketplace. In Jira, click on Apps → Explore more apps to open the Marketplace.

## Step 3:

Search for **Appvibe Miro Integration**. Use the search bar to find the app.

## Step 4:

Install the App. Click Get app or Try it free. Confirm the installation and grant the required permissions.

## Step 5:

Configure the App. Once installed, go to Manage Apps in the Admin section to ensure it's enabled. The panel will now appear in your Jira issue view.

## Step 6:

Start Using the App to add and view links for Miro. Open any Jira issue to view, add, or manage Miro links directly.

# Working with Links

# Add a Link

---

## Step 1:

Inside a Jira issue, click the "Add" button. A form will appear inline, allowing you to enter the required details.

## Step 2:

Enter the Embedded URL – the link to your Miro design. Optionally, provide a Title – a meaningful name for the design. Click the "Add" button again to add your Miro link to the Jira issue.

# View a Link

## **Step 1:**

Inside a Jira issue, find the link you want to view and click the view icon for that link. An inline popup will appear showing your Miro.

## **Step 2:**

You can also click this for full screen viewing.

# Edit a Link

---

## Step 1:

Inside a Jira issue, find the link you want to edit and click "Edit" from the link dropdown. A form will appear inline, allowing you to edit the following:

- Embedded URL – The link to your Miro design.
- Title – A meaningful name for the design. (optional)

## Step 2:

Click the save button again to add your Miro link to the Jira issue.

# Delete a Link

---

## **Step 1:**

Inside a Jira issue, navigate to the link you wish to remove. Click the menu for that link.

## **Step 2:**

Select "Delete" from the menu. You will be prompted to confirm if you want to delete this Miro link.

# Advanced

# View Link History

---

## Step 1:

Install the Appvibe Miro Integration app from the Atlassian Marketplace into your Jira instance.

## Step 2:

When a Miro link is added to a Jira issue, the app will automatically start tracking any modifications made to the link.

## Step 3:

To view the modification history of a Miro link, navigate to the Jira issue that contains the link.

## Step 4:

Look for the Appvibe Miro Integration panel within the Jira issue, where you can access the modification history.

## Step 5:

The history is stored at both the link level and the Jira issue level, allowing you to view changes at any time.

## Step 6:

Review the modification history to see who made changes, what changes were made, and when they occurred.

## Step 7:

Use this historical data for auditing purposes, analyzing collaboration patterns, or resolving any discrepancies related to Miro link usage within Jira issues.

# Link Permissions

---

## Step 1:

Go to the Appvibe Miro Integration configuration page, or click permissions from within the link settings in a Jira issue.

## Step 2:

Select the desired permissions for each user to control access to the links in the given issue. Assign users one of the following permissions:

- **Viewer:** Users can see the link in the Jira issue.
- **Editor:** Users can add, edit, or remove links in the Jira issue.
- **Admin:** Users can manage link permissions for other users.

## Note:

Link permissions are managed at a system level. You must be an admin to manage link permissions.

# Help

# FAQ

---

## **What if the Miro link doesn't load?**

Ensure the link is public and accessible. If Miro blocks embedding, try opening it in a new tab.

## **Can I add multiple links to one issue?**

Yes, you can add multiple Miro links to each Jira issue.

## **How secure are my Miro links?**

All links and related meta data are stored within Atlassian's Forge platform. Our app data is stored using Forge's hosted storage solutions, which are integrated into Atlassian's cloud infrastructure. This setup ensures that app data benefits from the same data residency features as Atlassian's core products, allowing administrators to control where the data is hosted.

## **Is there a limit to the number of Miro links I can add?**

There is no set limit to the number of Miro links that can be added to a Jira issue. However, for better performance and organization, it's recommended to manage the number of links based on your team's needs.

## **How do I ensure my Miro link permissions are correct?**

Ensure that your Miro board permissions are set to "Anyone with the link" as either a viewer or editor, depending on the access you want to grant. This will ensure that the integration functions smoothly without permission issues.

## **Can I revoke access to a Miro link after it's added?**

Yes, you can change the sharing settings directly in Miro to restrict or remove access as needed. Changing permissions in Miro will affect access for anyone trying to view the link through the Jira issue.

## **Will deleting a Miro board affect my Jira issue?**

If a Miro board is deleted, the link in the Jira issue will no longer be valid and will not display the board's content. Ensure you update or remove invalid links as necessary.

## **How often do the Miro links update in Jira?**

Miro links embed dynamic content, so updates made on the Miro board reflect in the Jira issue in real-time without needing manual updates.

## **What should I do if I encounter an error with Appvibe Miro Integration?**

Check for any internet connectivity issues, verify that the Miro link is correctly formatted, and ensure that integration permissions are correctly set. If issues persist, consult the Appvibe support team for assistance.

# Support

# Support and Contact

---

## **Overview:**

The Appvibe Miro Integration app simplifies the process of managing and accessing Miro designs directly within Jira. This seamless embedding allows your team to remain focused on their tasks without the need to constantly switch between different tools.

## **Support Contact:**
