

Key Features

Feature 1: Add Links: Embed Swagger links directly into Jira issues for quick access to spreadsheets. This feature ensures that all relevant Swagger data is directly accessible within the context of a Jira issue, streamlining workflow and improving efficiency.

Feature 2: Edit Links: Update or modify embedded Swagger links as the spreadsheet changes. This allows users to keep the information current without the need to create new links, maintaining consistency across the documentation and issues.

Feature 3: Remove Links: Easily remove links when they are no longer relevant, keeping your Jira issues clutter-free and current. This helps in managing the workflow and ensuring that only necessary and valid links are available.

Feature 4: View Links in Preview and Full Screen: Preview Swagger content directly within Jira or choose to expand it to full screen for a more detailed view. This flexibility allows users to interact with the data in a way that suits their needs.

Feature 5: Sort Links: Organize Swagger links by custom criteria, name, or date, providing a more structured view of the linked content. This supports easy navigation and quick access based on user-defined parameters.

Feature 6: Realign Links: Adjust the positioning of Swagger links within the Jira issue for better visibility and organization. This feature provides enhanced control over how links are presented alongside issue content.

Feature 7: View Links in List or Tile View: Toggle between list or tile layout for viewing links, allowing users to choose their preferred format for ease of use and management.

Feature 8: Manage Permissions: Control who can view and interact with Swagger links embedded in Jira, securing sensitive information and ensuring that only authorized personnel can access the links.

Feature 9: View Link History: Access the history of changes made to each Swagger link, offering a comprehensive audit trail and enabling users to track modifications over time for accountability and review purposes.
