

Getting Started

To get started with **Appvibe Test Management for monday.com**, there are a few setup requirements and initial steps to follow. This guide will walk you through what you need and how to start using Appvibe efficiently.

Requirements:

1. **monday.com Account:** You will need an active monday.com account with administrator privileges to set up and manage the integration.
2. **Appvibe Subscription:** Ensure that you have the necessary license for Appvibe Test Management.
3. **Permissions:** Verify that you have appropriate permissions in monday.com to install and configure apps.

Initial Setup Steps:

1. **Install Appvibe:**
 - Navigate to the monday.com **App Marketplace** and search for "Appvibe Test Management."
 - Click **Install** and follow the prompts to connect Appvibe to your monday.com account.
2. **Create a New Test Management Board:**
 - Once Appvibe is installed, create a new **Test Management Board** or integrate Appvibe into an existing board.
 - Customize the board columns (e.g., Test Case ID, Test Step, Expected Result, Actual Result) to match your team's needs.
3. **Invite Team Members:**
 - Use monday.com's permission settings to invite team members and assign roles (e.g., Testers, Test Managers).
 - Assign specific permissions for creating, executing, and managing test cases.
4. **Sync with Existing Workflows:**
 - Integrate Appvibe into your existing monday.com workflows by linking it to relevant projects or boards.
 - Set up automations or notifications to alert team members when a test cycle is ready for execution.
